

TASK 4 – Data Visualization

Aim:

To create graphs and visualize the dataset in an easy and understandable way.

Code:

```
import pandas as pd

import matplotlib.pyplot as plt

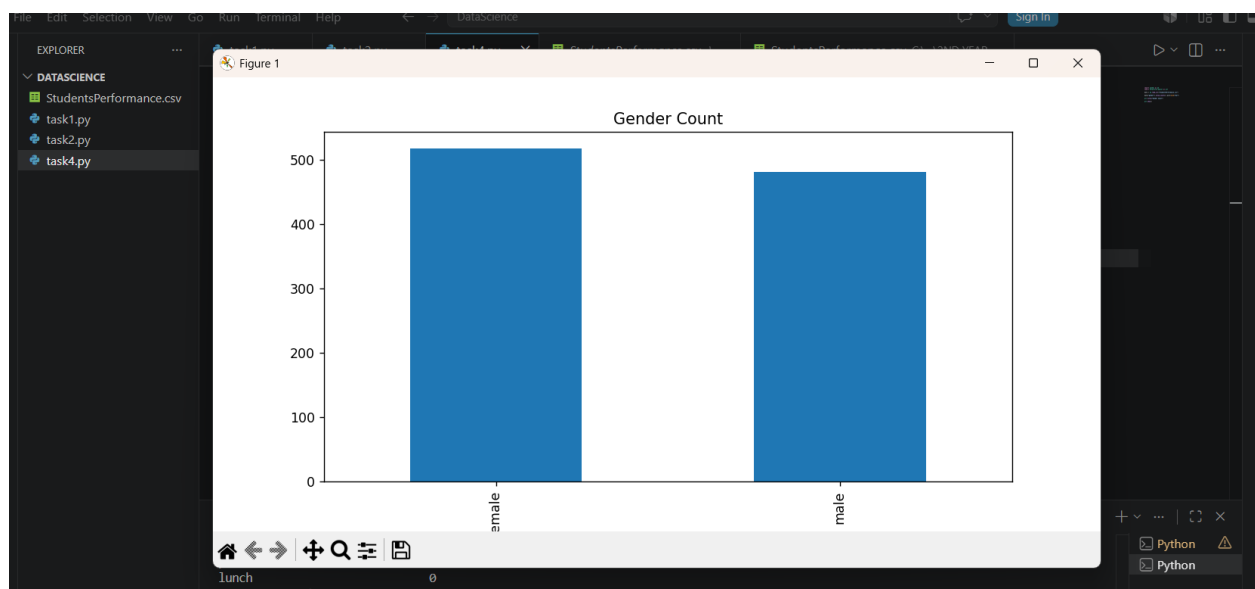

data = pd.read_csv("StudentsPerformance.csv")

data["gender"].value_counts().plot(kind="bar")

plt.title("Gender Count")

plt.show()
```

Output:

Description:

In this task, a bar graph was created using the gender column from the dataset. The graph helps to understand the number of male and female students easily.

Conclusion:

The dataset was visualized successfully using a bar chart. Data visualization helps in understanding the data clearly.
